Due: Well, since this is intended just for practice, I suppose there is no real due date; however, to get answers (and feedback), you need to submit it to me. Try to have this ready for the review session on Thursday, 10-May-2007.

1) Provide proper names for each of the following structures: (you may need to use your book to figure out some of the more challenging structures!)

- a)
- b)
- c)
- d)

2) Provide proper structural formula for each of the following names:
   a) 3-ethyl-1-pentene
   b) 1,1,2,2,,-tetraphenylethane (phenyl is the name for a benzene when it is a substituent or a radical.)
   c) 2,2,4-trimethylpentane (this is the octane in gasoline)
   d) cis-3-hexene
