

## MATH 6: HOMEWORK 0

Due Friday, January 27, 2012

Write me a letter addressing the following points:

1. **What are your goals in this class?** Why you are taking this class, what grade you hope/expect to get, and what you want to learn or get out of it?
2. **How do you plan on achieving these goals?** Explain the specific strategies you plan on employing. What techniques, study habits etc. will you use?
3. **Anything else?** If there's anything else that you feel is important for me to know for your success in this course, please let me know. This might include your previous courses and experiences, your current course load, or your particular learning style.

This letter need not be longer than a page or two, and what you say will not have an effect on your grade in this course. **Please be honest.** It will help me to make this course useful and relevant to you.
