

MATH 191 FUNDAMENTALS OF MATHEMATICS II
HOMEWORK 0
DUE: JANUARY 15, 2014

Please write me a letter introducing yourself. Include your year and major(s), and a brief description of math classes you've taken recently. In your letter, please also address the following.

- **What are your goals for this class?** Why are you taking this class, what grade do you hope/expect to get, and what do you want to learn (content or skills)?
- **How do you plan on achieving these goals?** Explain the specific strategies you plan on employing. What techniques, study habits, etc. work for you and will you be using?
- **Anything else?** If there's anything you feel is important for me to know for your success in the course, please let me know. This might include previous experiences, your current course load, or your particular learning style.

Your letter need not be longer than a page, and what you say will not affect your grade in the course. *Please be honest.* I hope the information you give will help me make the course more useful and relevant to you.
